SUMMARY

Android Developer with production experience across **10+ mobile applications** spanning **4 companies**, building and scaling apps using **Android** and **Kotlin Multiplatform** across Android, iOS, Desktop, and Web. Currently **SDE 1 - Android** at **Swipe (YC S21)**. Passionate about open source — selected for **Mifos Summer of Code 2025**.

EXPERIENCE

Android Developer — Swipe (YC S21), Hyderabad

SDE 1 - Android

June 2026 – Present

Android Developer Intern

Dec 2025 – June 2026

- Modernized **10 production flows comprising 70+ screens** by migrating legacy XML UI to Jetpack Compose and implementing scalable multi-module MVI architecture.
- Introduced **Gradle convention plugins** via a **build-logic** module, centralizing build configuration across modules and reducing build script duplication by **80%**.
- Investigated and resolved **50+ production crashes**, UI defects, and customer-reported issues using Firebase Crashlytics and Intercom, improving application reliability and user experience.

Open Source Mobile Developer — Mentor — Mifos Initiative, Remote

Nov 2024 – Present

- Contributing to open source in free time, alongside other full-time/internship commitments.
- Selected for **Mifos Summer of Code 2025**, awarded **\$2,500 stipend**.
- Migrated **20+ modules** to Kotlin Multiplatform and modernized **150+ screens**, enabling shared codebases across Android, iOS, Desktop, and Web.
- Authored **110+ pull requests** with a **98% merge rate** and reviewed **230+ pull requests** across multiple production fintech applications.
- Mentoring developers for **GSoC** and **C4GT**. Guided 10+ new contributors.

Mobile Development Intern (KMP) — MobileByteSensei, Remote

May 2025 – Nov 2025

- Developed features across **7 production mobile apps** using Jetpack Compose and Material 3.
- Implemented **WhatsApp Status Downloader** feature, growing installs from **1K to 10K+**.

SKILLS

Languages	Kotlin (Coroutines, Flow), Java, SQL
Android	Android SDK, Jetpack Compose, Material 3, Room, Retrofit, Ktorfit, Coil, Hilt, Koin
Architecture	MVI, MVVM, Clean Architecture, Multi-Module, Dependency Injection
Multiplatform	Kotlin Multiplatform (KMP) — Android, iOS, Desktop, Web
Developer Tools	Git, GitHub Actions, Firebase, Intercom, Cobrowse, Jira

PROJECTS

Expense Tracker — Offline KMP Application

- Built an offline-first **Kotlin Multiplatform** app for **Android, iOS, and Desktop** to record expenses with categories, sub-categories, and monthly budgets.
- Implemented spending insights with category/sub-category-wise tracking, **biometric and PIN app lock**, and **multi-language support**.

r-components — Android UI Library

- Built a reusable **Jetpack Compose UI component library** published via JitPack, enabling developers to integrate production-ready elements without building from scratch.
- Shipped a standalone sample project demonstrating real-world integration patterns.

EDUCATION

B.Tech in CSE — RGUKT RK Valley, Kadapa (CGPA: 9.0/10)

June 2022 – April 2026
